

Isaac Isaac

Product Designer · Front-End Developer · Digital Marketer

(407) 437-3838 | isaacbisaac0@gmail.com | friendscallmeibi.com | linkedin.com/in/isaacx2

PROFILE

Product Designer and Front-End Developer with a 4.0 GPA and B.A. in Digital Media (Web Design) from the University of Central Florida. Experienced in end-to-end product design, user research, wireframing, prototyping, and front-end development, with an active practice of integrating AI tools into the design-to-code workflow. Passionate about creating intuitive digital experiences that balance user needs with business goals.

EDUCATION

University of Central Florida Aug 2022 – May 2026

B.A. Digital Media – Web Design Track · GPA: 4.0 · Dean's List & President's List

- Relevant Coursework: User-Centered Design, Front-End Web Design, Client-Side Scripting, Server-Side Scripting, AI Development, Social Platforms, Computer Fundamentals for Business
- Activities: Knight Hacks, Knight's Design Interactive, Design & Code Club, Downtown Orlando UX Meetup

EXPERIENCE

Fourddo — Product Design Intern May 2026 – Present

Orlando, FL

- Solved a complex onboarding challenge by designing a content architecture that oriented new fellows to the platform's structure immediately, recognizing that once fellows understood where resources lived, the experience became self-sustaining.
- Collaborated with curriculum, branding, and leadership stakeholders to transform a three-phase educational program into a scalable digital experience with structured weekly learning modules.
- Designed site navigation, access systems, and member permissions ahead of a Summer 2026 Boston pilot, with planned expansion to 8 filmmakers across multiple U.S. cities in 2027.

SELECTED PROJECTS

PrizeKicks — The People's Sneaker Marketplace *Product Design · Web Development*

- Identified pricing opacity as the primary trust barrier through user interviews, then designed a marketplace prototype that surfaced real-time market data at the card level, reducing the cognitive load of evaluating a fair deal before clicking into a listing.
- Translated research findings into a complete hi-fi Figma prototype and a functional React demo, reframing the buying experience around buyer confidence.

Knourish — UCF Campus Mobile Food Ordering App | *Product Design*

- Identified a recurring stress paradox in campus dining through research: without reliable wait time visibility, students are forced to choose between eating and making it to class on time, leading to a negative feedback loop of frustration and productivity loss.
- Integrated Claude's Figma MCP into the design-to-code workflow, reducing handoff friction and translating hi-fi designs directly into testable React components.
- Built a UCF-branded Figma design system with color tokens, component library, and Phosphor icon integration.

SKILLS & TOOLS

Technical: Figma, Claude, HTML 5, CSS3, Javascript, TypeScript, React, MySQL, Adobe Photoshop, After Effects, Github

Design: User Research, User-Centered Design, Wireframing, Prototyping, Design Systems, Usability Testing, FigJam

Professional: Digital Marketing, Client Communication, Team Collaboration, Data visualization, Microsoft Suite
